Subject: First Property

We plan to start at **Ex. 6 - Personal Privacy** on Friday. Tim Drexler is meeting the owners this morning to talk about the water sampling. We have to have a 6 hour period where water is not used prior to taking the sample and we are going to try to schedule with them when is it most convenient to take the sample. Tim left Obed a message yesterday and will call him today once he has more detail on when we will sample. Below is the link to the quality assurance project plan. We are using the Flint protocol. If you have questions, give me a call at 312-886-7278.
